REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: no prior art has been found, nor presented, that either teaches or fairly suggests the production of polyolefin compositions having all of the constituents and compositional limitations, thereof, as recited and claimed herein. While the references teach monomer concentrations and even polymer limitations that may broadly overlap with those claimed herein, the inclusion of the specific content of alpha-olefin and ethylene monomers do not coincide with the limitations recited. The ratio of these constituents is not shown to be within the range recited. The MFR of the composition has not been shown either. As such, since there are no other outstanding issues with regard to the clarity or enablement of the claims, these claims are deemed to contain allowable subject matter.

Information Disclosure Statement

Regarding the Information Disclosure Statement of 31 March 2009, the entry of these documents on a PTO-Form 1449 Information Disclosure Statement is improper, and these entries will not be initialed.

1) The Examiner has access through the Electronic Desktop Application Navigator (eDan) system of all applications filed in the US Patent and Trademark Office, and is able to monitor the prosecution of any copending application. As such, these citations are unnecessary and redundant and can only serve to confuse the record of the instantly filed application.

2) The MPEP specifically shows a proper PTO-Form 1449 Information Disclosure Statement at MPEP 609, pages 600-143 and 600-144 in the 5th Revised Edition. The content of these includes "U.S. Patent Documents," "Foreign Patent Documents," and "Non-Patent Literature Documents," and when citing the latter to include, the author, title of the article or item, date, pages, volume-issue, publisher and city of publication. These documents are clearly not US Patents, foreign patents and cannot be construed as being literature, and if so, are not cited in proper format, as required by the Form.

3) Furthermore, the citation of these Office Actions on the face of a published patent may damage the confidentiality of the copending applications that may not be finished in prosecution. These documents are not printed publications and will not be found in libraries or other depositories of information so that the general public would have access to these files without compromising the integrity of any copending file, whose actions are cited by applicant, that may not be finished in prosecution, and still pending.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nathan M. Nutter whose telephone number is 571-272-1076. The examiner can normally be reached on 9:30 a.m.-6:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James J. Seidleck can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
